

Joshua Reitz | Full-Stack Developer

(706) 442-3754 | jreitz2@gmail.com | [Portfolio](#) | [LinkedIn](#)

Skills:

Front-end: JavaScript, TypeScript, React, React Native, Next.js, HTML5, CSS3, Tailwind

Back-end: Python, Java, Node.js, Express, MongoDB, SQL, Firebase, Supabase

Tools: Git, GitHub, Jest, Vitest, AWS, Linux

Projects:

BiteMap (Demo: [BiteMap](#))

2025-Present

Restaurant review application I created that allows users to search for restaurants using Google Maps, browse reviews from other users, and contribute feedback. Built with React, Vite, CSS3, Supabase, and SQL.

(Code: [BiteMap](#))

- Integrated with Google Maps and Places APIs for interactive geolocation
- Utilized Supabase for authentication and relational SQL database

SpellScribe (Demo: [SpellScribe](#))

2023-Present

A full-stack web app for creating D&D5e characters and filling their spellbooks with data obtained from the D&D5e API. It utilized a number of frontend and backend technologies including HTML5, CSS3, React, Node.js, Express.js, MongoDB, REST API, and more. (Code: [SpellScribe](#))

- Used MongoDB (noSQL) to store character data
- Built using modern React with Hooks

Just Chat (Demo: [Just Chat](#))

2023-Present

A real-time chat application for instant communication between users. I designed and developed this app from the ground up using React, Firebase, and CSS3. It includes features like direct messaging, group chats, and user authentication. (Code: [Just Chat](#))

- Integrated Google Authentication for secure user sign-in
- Enabled real-time messaging using Firebase Firestore (noSQL)

On-hand Cuisine (Demo: [On-hand Cuisine](#))

2023-Present

Mobile app that suggests recipes based on ingredients users already have in their kitchens. Web app version available. I built this with React Native, TypeScript, React, and CSS3. It features 5 filters based on dietary restrictions, and has the ability to save recipes to a list of favorites. (Code: [On-hand Cuisine](#))

- Deployed app to the Google Play console for distribution on Android
- Leveraged React's useContext for managing global state

Education:

Bachelor of Science in Software Engineering

2024-2025

Western Governors University

Odin Project

2022-2024

Self-paced web development boot camp

Master of the Arts in Sociology

2010-2012

University of West Georgia

Certifications:

- CompTIA Project+ (2025)
- AWS Certified Solutions Architect (SAA-C03) (2024)
- AWS Certified Cloud Practitioner (CCP) (2024)

Work Experience:

Freelance & Contract Web Developer

2024-Present

Completed multiple freelance and short-term contract projects focused on building responsive, full-stack web applications for small businesses and clients under NDA.

- Delivered custom websites for restaurant clients with a focus on usability and branding
- Built and deployed a full-stack application with Next.js and Supabase

Storm Pizza Co. - Restaurant Manager

2022-Present

I established the infrastructure and workflow for this thriving pizza concept from scratch. I wrote the menu, initialized the ordering guides for food and other products, wrote the prep lists, and personally trained a new staff.

- Crafted order guides for all products while managing procurement and cost control
- Conducted interviews and facilitated the hiring process for new team members
